Tests run on Android 4.4.4 KitKat and 4.2.2 Jelly Bean

<u>App Fixes</u>

"Remember Me" on login page

When in Username field, enter key on keyboard should put cursor down in Password field. When in Password field, enter key on keyboard should submit and log you in.

Default view when logging in should be list of services not the lessons list

      Services for list:

            Safety Lessons

            Documentation

            Forms

            Repository Tree

            Webinars

Side menu should contain the following options:

      When on Main Menu:

            Logout

      When on any other menu:

            Safety Lessons

            Documentation

            Forms

            Repository Tree

            Webinars

            Logout

Side menu should have an arrow or "Back" option to hide. Clicking away from it isn't very intuitive

Sliding left gets the side menu to come out, but sliding right does not retract it.

Lesson List- English option and Spanish option do not show the same Lessons list.

After clicking on desired lesson, it should load into English lesson by default with an option to change lesson language at the top of screen. We don't need a "preview" for the lesson as it loads now.

Should be able to use "pinch" to zoom in and out of lesson so it's easier to read.

Change lesson page by scrolling down instead of the left and right arrows. Have lessons load exactly as the "previews" do now.

Lesson Quiz should be located at the bottom of the page above the signoff sheet button

After switching from "Page 1" of lesson to "Page 2" then back to "Page 1" view gets corrupted and does not display the text and images properly. On Android 4.2.2 Jelly Bean, PDF's don't load at all.

Signoff sheet needs to be locked into place. The page moves when signing.

Signoff sheet creates double signature on Android 4.2.2 Jelly Bean (Signing in one place creates a duplicate signature just above it)

Signoff sheets needs to scale better when in landscape mode. Signature line does not follow the finger when drawn. The closer you get to the right edge, the further the draw point is from your finger.

After entering name on Signoff sheet and signing, pressing "I Agree" button displays an error "Please select employee"

When displaying "Documentation" PDF, it displays one large text string "Dummy PDF Placeholder" but then switches to several smaller text string "DUMMY PDF Placeholder" that repeat 4 or 5 times down the page.

Repository not loading correctly
